[DOC] PIXEL SHUT OFF AND WONT TURN BACK ON

Over that last few weeks, My daytime running lights have been shutting off while im driving and wont turn back on and while I was driving to work this morning in the dark, about 10 min into driving they shut off Google Pixel 2s Active Edge squeeze feature will return on the Google Pixel 3. Mine was my PSU, the 12V was dying and once my GPU started to draw a certain amount of power from the PSU my system would shut off. I can hear a fan running but no lights on and no picture. Picture went out, turned the TV off back on had picture 5 minutes later picture went out and stayed out. A paper clip test only tells you if the PSU will turn on, not if it actually works.

My tv just shut off - and wont turn back on? I was on my computer a while ago and it just shut off. The power light is on. What is the problem and how do I fix it?

Hello, Randomly when I was playing a video game my laptop had shut off and ever since I have been unable to turn it back on. It was literally on and working 1 second, then useless the next without change in environment etc. Create your own and start something epic. Sometimes turning it on with the charger connected helps as the screen turns on and the phone is sort of "running" with the charger connected. But for some reason it wont turn back on. Windows Defender Turned off and wont turn back on It used to work fine, im scared that theres a virus, trojan or some piece of crap blocking it on my system.
